

**CATALOGO GENERALE**  
GENERAL CATALOGUE

**CONFALÖNIERI**

Gruppo Confalonieri, con il brand storico Confalonieri, dal 1950 produce accessori e complementi per il mobile e l'arredamento; da sempre persegue un approccio al prodotto che pensa innanzitutto all'aspetto funzionale ed ergonomico che si concretizza, al termine del processo, in un buon oggetto di design.

L'obiettivo non è, dunque, la forma fine a sé stessa, ma una soluzione di design capace di integrare la funzionalità tipica di un prodotto utile e facilmente utilizzabile. L'attenzione alle tendenze e all'evoluzione del mobile e dell'arredamento più in generale, è alla base del progetto di Confalonieri, per consentire il dialogo tra il mobile stesso e l'accessorio.

Seguendo questo approccio, la maniglia talvolta è un'impugnatura caratterizzante, talaltra una variazione della superficie dell'anta o un elemento basico rispettoso di pulizia e linearità; sempre, una soluzione originale per l'apertura del mobile.

La gamma di Confalonieri si è arricchita nel tempo con soluzioni per tutti gli ambienti e risposte alle diverse esigenze di utilizzo.

I prodotti Confalonieri vengono concepiti e progettati in Italia e industrializzati internamente seguendo i dettami dell'italian style. L'eccellenza è assicurata dal know-how specialistico acquisito in decenni di esperienza e attraverso il costante controllo della qualità lungo tutto l'arco dei processi produttivi.

3

Gruppo Confalonieri, with its historical brand Confalonieri, since 1950 produces accessories and complements for furniture and all the furnishing sector, unwaveringly approaching the product with special focus on the functional and ergonomic features that make a quality design item.

Hence, the goal is not form in itself, but a design solution that merges the functional traits typical of a product that is both useful and designed for easy use.

A keen study of trends and evolution of furniture underpins project Confalonieri to create interaction between the item of furniture and the accessory.

Following this approach, the handle can act, at times, as a characterizing grip, and at other times as a variation on the door surface or as a clear-cut linear basic element.

Unfailingly an original solution for opening the furniture item.

Confalonieri range has been enriched over time with solutions for all environments and responses to different user requirements.

Concept, engineering, development of equipment, industrialization, take place internally, following the Italian-style approach. Excellence is also guaranteed thanks to the specialized knowhow acquired over decades of experience and the constant quality checks carried out throughout the entire production process.

# MANIGLIE

## HANDLES

## Collezione *No Screw* *No Screw* collection

Design innovativo per una nuova funzionalità.  
Un'assoluta novità: le maniglie della collezione *No Screw* sono realizzate in lamiera di acciaio e sono progettate per l'applicazione senza viti e senza fori.  
Sono fornite con adesivo già applicato e kit di fissaggio.

Innovative design for a new functionality.  
An absolute novelty; the handles of the *No Screw* collection are produced out of steel sheet and designed for application without screws and without holes.  
They are supplied with adhesive already applied and fixing kit.

## MB09174

Collezione *No Screw*  
Design: MASSIMO CAVANA

Vedi video  
See video

**note**  
E' sufficiente pulire con il prodotto fornito l'area su cui applicare la maniglia, togliere la pellicola protettiva dall'adesivo e posizionare la maniglia sul mobile.  
Nei primi secondi di applicazione è ancora possibile, se necessario, riposizionare la maniglia.  
Applicazione su legno, vetro, alluminio

**notes**  
Just clean with the supplied product the area on which to apply the handle, remove the protective film from the adhesive and place the handle on the cabinet. In the first few seconds of application is still possible, if necessary, to reposition the handle.  
Application on wood, glass, aluminum

**plus**  
Forme inedite.  
Nessuna lavorazione di foratura sul mobile, applicazione facile e veloce senza l'ausilio di attrezzatura tecnica.  
Resistenza garantita 3M.  
Test effettuati sulle nostre maniglie secondo norma ISO 1939.

**plus**  
Unpublished forms.  
No drilling on the cabinet. Quick and easy application without using technical or professional tools.  
3M guaranteed resistance.  
Tests carried out on our handles according to ISO 1939.

70

“ con Matrix, la maniglia non è più un mero elemento decorativo, piuttosto una parte dell'intero, capace di mimetizzarsi, coordinarsi, contrastare, arricchire o stupire. In ogni caso di appartenere al progetto stesso.

”

La maniglia con Matrix non è più forma ma supporto di finitura, la forma diventa neutra per raccordarsi con le forme del mobile e la maniglia diviene superficie materica o per sua finitura o per il materiale che supporta.

Con Matrix la maniglia diventa un elemento a disposizione del progetto. E' personalizzabile; il decorativo utilizzato dal produttore del mobile può essere applicato sulle maniglie per mantenere continuità di finitura. E' anche possibile supportare una stampa digitale personalizzata (un disegno, un logo, una scritta, una foto...).

Con Matrix è possibile utilizzare le maniglie rendendole invisibili o per richiamare il decorativo utilizzato su un'altra parte del mobile.

“with Matrix, the handle is no more a decorative element only, rather a part of the whole, sometimes capable to camouflage, coordinate, counteract, enrich or surprise. In each case the handle belongs to the same project.”

The handle with Matrix is no longer shape, rather a finishing support, the shape becomes neutral to match furniture lines and the handle becomes a material surface as for its finish or for the material it supports. The furniture handle with Matrix becomes an element available for the furnishing project. It is customizable; the decorative used by the furniture manufacturer can be applied on the handles to maintain continuity of the finishing. It is also possible to support a personalized digital print (a drawing, a logo, a text, a photo ...).

With Matrix it is possible to use the handles making them invisible or to recall the decorative used on another part of the piece of furniture.

note

Maniglia con un'elegante sezione a "L" che viene fissata sul retro con viti mordenti. Il suo profilo garantisce un'ottima presa e un utilizzo di spessore anta da 14 a 25. La maniglia può essere applicata in sormonto del bordo e del retro o incassata.

notes

Handle with an elegant "L" section that allows back fixation. Its profile provides an excellent grip and an application on door with thickness between 14/25 mm. The handle can be applied overlapping edge and back or recessed.

#### note

È una maniglia dal fissaggio tradizionale ma progettata in maniera tale da poter essere applicata anche a filo del perimetro dell'anta grazie ai fori di fissaggio abbassati. I punti di fissaggio sono nascosti al centro e sul lato mostra solo una "L" simulando un lamierino molto leggero.

Al di là di questo suggerimento può essere liberamente posizionata in qualsiasi punto dell'anta (si consiglia applicazione orizzontale).

#### notes

It is a conventional handle but designed to be applied also flush with the perimeter thanks to the lowered fixing holes. The attachment points are hidden in the center and by the side it shows only a "L" simulating a very lightweight section. Beyond this suggestion can be freely positioned in any part of the door (we recommend horizontal applying).

MB09150/B

note

Maniglia da incasso su bordo anta/cassetto. L'incasso avviene praticando due fori ad interasse 128 mm sul bordo per i perni presenti sulla maniglia (si consiglia un gocciolo di colla/silicone per fissarla). L'incasso può essere a filo (praticando una fresata sul bordo dello stesso disegno della maniglia) oppure con leggero sormonto facendo solo i 2 fori per i perni. Ne risulta un effetto molto elegante, con la vista di un piccolo spessore ma che al tempo stesso garantisce un'ottima presa. Può essere montata sia in orizzontale che in verticale.

notes

Flush handle on door/drawer edge. The application is done by making two holes at 128 mm ctc dist. on the edge to insert the handle pins (we recommend a drop of glue/silicone to secure it). It can be fixed completely flush or with slight overlap. The result is a very elegant effect, with the view of a small thickness in the front, but providing an excellent grip at the same time. It can be mounted either horizontally or vertically.

note  
Maniglia da incasso sul bordo anta/cassetto con fissaggio int. 96 mm.  
Una maniglia che mantiene un'assoluta pulizia dell'anta.  
Lo scasso viene realizzato con un solo passaggio della fresa seguendo il disegno della maniglia. Può essere posizionata sia in orizzontale che in verticale.

notes  
Fitted handle to be fixed on the door/drawer edge, with fixing ctc dist. 96 mm.  
The handle keep an absolute cleanliness of the door.  
The recess is made with a single machining passage following the design of the handle. It can be positioned both horizontally and vertically.

innovative finishings  
(page 169)

note  
Nella finitura bianco opaco, è possibile laccare in autonomia la maniglia come l'anta del mobile offrendo così una maggiore integrazione. Poiché la maniglia è costituita da due parti separate (impugnatura e fondello), è possibile creare in autonomia una finitura diversa ("tono su tono" o in contrasto) tra l'impugnatura e il fondello.

notes  
In the matt white version the handle can be lacquered by the customer like the door to ensure better integration.  
Since the handle has two separate sections, grip and base can feature different finish created by the customer.

note

Nella finitura bianco opaco, è possibile laccare in autonomia la maniglia come l'anta del mobile offrendo così una maggiore integrazione. Poiché il fondo della maniglia è aperto è possibile inserire un fondo in contrasto o "tono su tono" con la finitura del mobile.

notes

"Flush" built into the door In the matt white version, the handle can be lacquered by the customer like the door to ensure better integration. Since the handle is with no back, the back can be finished with the same-shade of the furnishing item or a with contrasting back insert.

MB09151/AO

MB09151/AF

come funziona

completamente integrata e facile da installare sull'anta, Soft è utilizzabile sia in verticale (con applicazione su armadi) che in orizzontale (su ante e cassettoni); in entrambi i casi, la maniglia può coincidere con la lunghezza dell'anta o del cassettone.

Quando premuta, Soft dà accesso ad una rientranza ricavata nell'anta stessa; cessata la pressione, ritorna in posizione di riposo con un movimento fluido e rallentato grazie ad un sistema di frizione meccanico.

this is how it works

fully integrated and easy to install in the door, Soft can be used both in vertical (with application in cabinets) and horizontal position (on doors and drawers). In both cases, the handle may coincide with the length of the door or drawer. Simply with hand pressure, Soft opening system provides access to a recess in the door itself, the pressure ceased, it returned to rest position with a smooth and fluid movement, through a mechanical dumping system.

# Soft system

international patent pending  
brevetto internazionale depositato

come appare

Design molto pulito, con il medesimo materiale e finitura del mobile. Il sistema di apertura Soft, è posto sul retro dell'anta e risulta completamente nascosto nello spessore stesso del legno (min. 22 mm).

Soft garantisce la perfetta complanarità della superficie frontale della maniglia rispetto all'anta e offre una copertura posteriore per mascherare e rendere cieca la fessura che si forma tra maniglia e anta stessa.

Con il suo design semplice, Soft è il perfetto connubio tra funzionalità ed estetica ricercata. Il primo sistema di apertura che preserva la pulizia architettonica del mobile e che non necessita di accessori.

this is how it appears

Very clean design, with the same material and door finishings. The Soft opening system is set on the back of the door and completely hidden within the wood thickness (min. 22 mm).

Soft ensures perfect alignment between the handle front surface and the door.

With its simple design, Soft is the perfect combination of functionality and refined aesthetics. The first opening system that preserves the architectural simplicity of the cabinet and that does not need accessories.

finiture  
argento 7  
cromo lucido  
nichel satinato

note  
Dopo aver passato i cavi dal buco presente sul piano della scrivania, le due parti del passacavi si chiudono lasciando attraversare i cavi e si inserisce, infine, il prodotto nella scrivania.

material  
die-cast metal

finishings  
silver 7  
polished chrome  
satin finish nickel

notes  
The two halves up the grommet clip together round the cables, after the cables have been passed through the hole in the desk-top. The grommet is then inserted into the desk-top.

materiale  
ganci e vite in acciaio  
scatola in nylon

finiture  
nero

note  
Aggancio regolabile per il fissaggio di mobili pensili. Consente di regolare, rimuovere e fissare nuovamente il pensile con estrema facilità. Si aggancia alla barra precedentemente fissata a muro e/o ad una vite appositamente fissata con il tassello a muro. La regolazione viene effettuata agendo sulla vite posta in alto. Il prodotto è in grado di sostenere fino a circa 60 Kg di carico verticale se agganciato alla barra, fino a circa 40 Kg se agganciato alla vite.

material  
hooks and screw  
made in steel, nylon box

finishings  
black

notes  
Adjustable connection for fastening suspended wall cupboards. It enables you to adjust, remove and refasten the wall cupboard with the greatest ease. It fastens to the bar previously secured to the wall and/or a screw that has been specially inserted using a wall anchor. It is adjusted using the screw positioned at the top. It can bear a vertical load of up to approximately 60 kg if fastened to the bar, and up to approximately 40 kg if fastened to the screw.

**ACCESSORI PER ARMADI**  
**WARDROBE ACCESSORIES**

# Flow System

design: EGIDIO PANZERA

Flow è il nuovo sistema di accessori per gli armadi e cabine armadio per la casa e per il contract. L'idea di progetto parte dalla volontà di immaginare con un'unica estetica coordinata ed armoniosa, tutti i molteplici accessori presenti nell'armadio contemporaneo.

Il sistema germina dall'elemento base quale il porta grucce estraibile, costituito da due profili rettangolari e un terminale maniglia; da chiuso, un sottile taglio orizzontale accoglie gli uncini delle grucce, generando, in tal modo, un'estetica elegante e minimale.

Il terminale maniglia è il dettaglio riconoscibile del sistema, si ripete in ogni configurazione, è l'elemento personalizzabile con il logo del mobiliere o del brand dell'hospitality, funge da maniglia ma anche da anello porta gruccia, inoltre svincolato dai profili dell'elemento base e montato in coppia sulle spalle, diviene porta tubo trasversale.

L'elemento base può essere arricchito di nuovi componenti per divenire, usato singolarmente sulla spalla, un porta cravatte-cinture.

Flow è prodotto nelle tonalità del bronzo, argento e nichel, ma è anche possibile rivestirlo con carta decoro legno coordinata agli interni dell'armadio.

# MA01201

portagrucce scorrevole - sliding hanging rail

design: EGIDIO PANZERA

162 Flow is the new accessories system for closets and walk-in closets for the home and contract. The project idea starts from the desire to imagine, with a single coordinated and harmonious aesthetics, all the many accessories in the contemporary cabinet. The system germinates from the base element: the sliding hanging rail, consisting in two rectangular profiles and a terminal handle; when closed, a thin horizontal cut welcomes the hooks of the hangers, creating, thus, an elegant and minimal aesthetics. The terminal handle is the recognizable detail of the system. It is repeated in each configuration, and it is customizable with the furniture producer logo or the hospitality brand. It serves as a handle as well as a hanger support ring; additionally, without the base element profiles and mounted in pairs on the shoulders, it becomes a tube support. The basic element can be enriched with new components for becoming, when used individually on the shoulder, a ties-belts rack. Flow is produced in shades of bronze, silver and nickel. It will be possible to cover it with wood paper decoration coordinated to the cabinet interior.

Elemento scorrevole porta grucce caratterizzato da un disegno geometrico. E' compatto e rispetta la pulizia del mobile nel quale viene inserito. Una volta estratto accoglie comodamente le grucce che si appoggiano su una guarnizione che protegge la parte metallica dai ganci e mantiene più ferme le grucce durante lo scorrimento. Lo scorrimento è fluido, grazie alla combinazione del tubo in alluminio anodizzato e di bussole in Teflon. L'elemento di copertura può essere personalizzato (es: con il logo del produttore o con il nome dell'hotel).

Sliding rail for coat hangers characterized by a linear design. It's compact and respects geometrical shapes of the closet in which it is inserted. Once extracted, it welcomes the hangers that rest comfortably on a gasket strip that protects the metal part from the hooks and secures the crutches while scrolling. Scrolling is fluid, thanks to the combination of anodized aluminum tube and Teflon bushings. The covering element can be customized (e.g. with the manufacturer's logo or name of the hotel).

Elemento scorrevole porta cinture e cravatte. I ganci si possono sollevare per far entrare comodamente le cravatte e le fibbie delle cinture. L'elemento si applica sulla spalla destra facilmente grazie ad elementi di aggancio in plastica al quale si fissa con un grano. Nel caso fosse necessario distanziare maggiormente lo scorrevole dalla spalla del mobile è possibile utilizzare più elementi di aggancio.

Sliding ties/belts rack. The hooks can be raised to comfortably enter the ties and belts buckles. The element is easily applied on the right shoulder thanks to the plastic coupling elements to which has to be fixed through a dowel pin. Increase distance between sliding and furniture shoulder is possible by using more coupling elements.

Il tubo del sistema è nella stessa finitura del supporto ed è caratterizzato da una sezione quadra sulla quale viene applicata una guarnizione per la protezione del tubo e per mantenere più ferme le grucce. Il tubo è disponibile in verghe da mm 3000, che il cliente può tagliare a misura; un tappo viene inserito nel tubo in modo da consentire il perfetto accoppiamento con il supporto che nasconde il taglio realizzato. La guarnizione è venduta separatamente.

The tube of the system is in the same finish of the support and is characterized by a square section on which is applied a gasket strip for the protection of the tube and to maintain steadier crutches. The tube is available in 3000 mm length, the customer can cut by measure; a plug is inserted into the tube so as to allow perfect matching with the support that hides the cut made. The gasket strip is sold separately.

Elemento scorrevole che consente di alloggiare le grucce anche in armadi poco profondi. Anche con un peso notevole, il meccanismo interno del prodotto consente la massima facilità di scorrimento. Il particolare design contraddistingue questo prodotto dai prodotti presenti oggi sul mercato, in quanto tutto in alluminio, dal disegno molto moderno, grazie anche all'inserto che funge da impugnatura che garantisce un'ottima presa. La zigrinatura sullo scorrevole impedisce alle grucce ospitate di schiacciarsi tra loro rovinando gli abiti sostenuti.

This sliding rail is applicable in shallow wardrobes and under shelves. Even when fully loaded the internal bearings in this product ensure a smooth easy slide. In addition to its smooth running action, this product is highly appreciated for its modern design, which sets it apart from other products on the market. The attractive ring handle adds an extra design element, while the teeth on the bar prevent the coat hangers from moving when the slide is moved in or out, protecting the clothes. The version in anodised aluminum guarantees maximum respect for the environment, being completely recyclable.

## Esempi di applicazione delle finiture innovative

Le finiture innovative di Confalonieri sono il risultato di una approfondita analisi di mercato e delle tendenze in atto nel mondo dell'arredamento, con riferimento ai colori e alle essenze più diffuse.

E' possibile utilizzare il prodotto Confalonieri tono su tono rispetto al supporto sul quale è applicato (per una presenza più discreta), oppure in contrasto, con una maggiore visibilità, pur mantenendo coerenza con l'insieme.

Gli accessori e complementi di Confalonieri trovano la loro applicazione sui mobili e più in generale negli spazi arredati e diventano importanti dettagli in grado di "dialogare" con il contesto in cui sono inseriti, aggiungendo valore all'insieme.

### wengè – wengè

trasparente oro – gold feeling

### tortora – turtledove

antracite satinata – satin anthracite

cemento – concrete

bronzo spazzolato – brushed bronze

bronzo spazzolato – brushed bronze

bronzo ossidato – oxidized bronze

## Application examples of innovative finishing

The Confalonieri innovative finishes are the result of an in-depth market analysis and trends in the furniture world, with reference to the most common colors and veneers. It is possible to use the Confalonieri products with a similar color approach with respect to the support on which it is applied (for a more discreet presence), or in contrast, with greater visibility, while maintaining consistency with the whole. The accessories and complements of Confalonieri find their

application on furniture and more generally in the furnishing and become important details able to “dialogue” with the context in which they are inserted, adding value to the whole.

### cemento – concrete

antracite satinata – satin anthracite

### rovere – oak

trasparente oro – gold feeling

cemento V – concrete V

bronzo spazzolato – brushed bronze

bronzo ossidato – oxidized bronze

bronzo ossidato – oxidized bronze
